

COMPREHENSIVE POULTRY BIOSECURITY GUIDE

Document ID: BIO-GUIDE-POULTRY-2026

Target Sector: Commercial Broiler, Layer & Breeder Operations

TERMINAL CLEANING PROTOCOL:

1. Dry Cleaning: Remove all poultry litter and dust from coops.
2. Pre-wash: Rinse surfaces with clean water to remove gross organic waste.
3. Disinfection: Apply Virukill 1:200 (0.5%) at 300ml/m² using high pressure.
4. Drinking Lines: Flush lines with Virukill 1:1000 to destroy biofilm.
5. Restocking: Allow 24 hours drying before placing new day-old chicks.

EFFICACY MATRIX:

- Avian Influenza H5N1: 99.999% kill at 1:200 (10 min)
- Newcastle Disease Virus (NDV): 99.999% kill at 1:200 (15 min)
- Salmonella enteritidis: 99.999% kill at 1:200 (5 min)
